# Connect Content Editor

The new default Content Editor in **Connect** allows you to easily add video, images, and audio in addition to basic options. There is also a fully-functioning HTML editor to make it easier to enrich your content.

NEW FEATURES

- Advanced options **(A)** are available for quick and easy access. Click this button to see more (⌄) or less (⌃) options.
- Basic tools **(B)** are shown in the interface such as Copy, Paste, and Find.
- The mashup tool **(C)** makes it easier to add multi-media to your content.
- A new math editor **(D)** helps to create and deiver equations directly from the Content Editor. You can save and copy/paste equations in the math editor by using mathML.
- The ability to directly edit content through HTML code **(E)**.
- The content editor features better fidelity in translation. Copy and paste content from Microsoft Word or code from Adobe Dreamweaver with no loss in translation.

BEST PRACTICES

- Use the advanced content editor for easy access to more in depth options to enrich your content.
- Use the HTML code function if you are familiar with HTML codes.
