

1 Captures with built-in camera or microphone

2 Identifies using “fingerprints” - GPS data often aids

3 Scan databases - grows as more people use it

4 Can solve puzzles like Sudoku! Think of the possibilities...

5 The best apps are **free**

6 Apps are available cross-platform - regardless of device.

7 Wi-fi or 3 G connectivity needed

7 Things to Know About Snap'n'Know Apps

BlackBerry

Android

iPhone

A **Snap 'n Know app** is an application on your mobile device that lets you capture sites and sounds around you. This could include photos, sounds, text, objects and landmarks.

These applications help you interact, learn and make sense of the world. Some apps include: Shazam, Google, What the font?, Word Lens and more.
