

## **APBI 200 - LAB 8 ASSIGNMENT**

**Write a short essay** contrasting the two soils observed at the UBC Farm. Explain the factors and processes responsible for soil formation at the 2 sites. Base your discussion on:

- a) The soil description compiled during the field trip.
- b) Information presented during this course (textbook, lecture notes, lab manual).
- c) Consider the factors of soil formation within your discussion.

Essay should be up to one page long (about 500 words), typed on a computer in a font size 12.

**[20 points]**

### **Required attachments:**

Your tables for the 2 soil profiles with all descriptions of soil horizons and soil order identification

**[10 points]**

*Total for lab 8 assignment*

**[30 points]**
