

1) How to compute the area of basic 2D shapes?

<p>Area of Square</p> 	$A = a^2$
<p>Area of Rectangle</p> 	$A = h \times w$
<p>Area of Triangle</p> 	$A = \frac{1}{2} (b \times h)$
<p>Area of Trapezoid</p> 	$A = \frac{1}{2} (a + b)(h)$

Area of Parallelogram

$$A = b \times h$$

Area of Circle

$$A = \pi r^2$$

2) How to compute the Surface Area (SA) of basic 3D shapes?

Surface Area of Cube

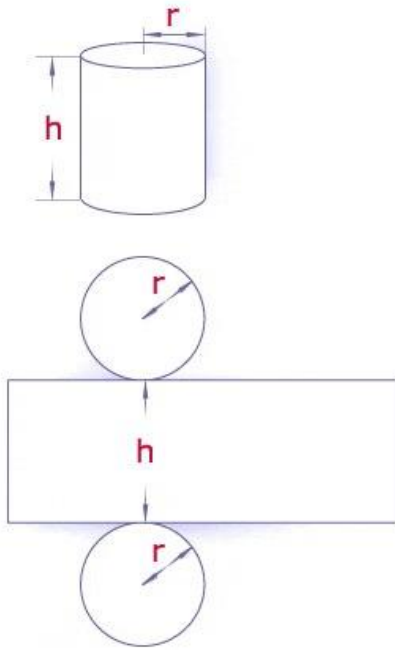

$$SA = 6a^2$$

Surface Area of Cuboids

$$SA = 2ab + 2bc + 2ac$$

Surface Area of Cylinder

$$SA = (2\pi r^2) + (2\pi rh)$$

Surface Area of a square Pyramid

$$SA = [\text{Base Area}] + 4(\text{Area of Triangular face})$$

$$SA = (a \times b) + 4\left(\frac{1}{2}b \times h\right)$$

Surface Area of Sphere

$$A = 4\pi r^2$$

Surface Area of Cone

$$A = \pi r s + \pi r^2$$

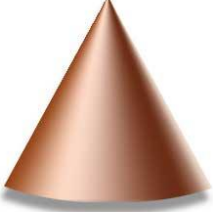

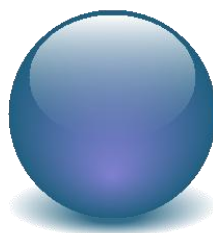

Surface Area of Tetrahedron

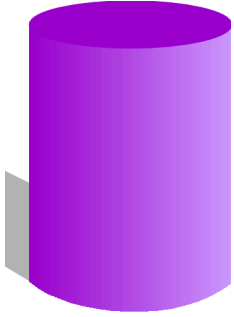

Tetrahedron

$$SA = a^2\sqrt{3}$$

3) How to compute the volume of basic 3D shapes?

Shape And Diagram	Formula of Volume	Example
Cone 	Volume= $\frac{1}{3} \times \text{Base} \times \text{Height}$ Base= $\pi \times \text{Radius}^2$	Radius= 4cm Height= 12cm $= \frac{1}{3} \times (\pi \times 4^2) \times 12$ $= 201.1 \text{cm}^3$
Sphere 	Volume= $\frac{4}{3} \times \pi \times \text{radius}^3$	Radius= 4cm $= \frac{4}{3} \times \pi \times 4^3$ $= 268.08 \text{cm}^3$

<p>Cylinder</p> 	<p>Volume= $\pi \times \text{radius}^2 \times \text{height}$</p>	<p>Radius= 4cm Height= 12cm</p> <p>= $\pi \times 4^2 \times 12$ = 603.2cm^3</p>
<p>Pyramid</p>  <p><small>www.shutterstock.com · 29226586</small></p>	<p>Volume= $\frac{1}{3} \times \text{Base} \times \text{Height}$</p> <p>Area of Base= Length X height</p>	<p>Length= 2cm Height (of base)= 3cm Height= 12cm</p> <p>= $\frac{1}{3} \times (2 \times 3) \times 12$ = 24cm^3</p>
