

Learning Design Summary

Learning Design Elements

Learners' Actions

Learning Principles

opportunities for discussion/
connection with others/teaching
others supports learning

availability of additional
resources encourages
personal exploration -
important to motivation

To develop mastery, students
must acquire component
skills, practice integrating
them, and know when to
apply what they have learned.
(Ambrose, et al)

multi-sensory
environments improve
learning (Mayer)

good questions stimulate
reflection: important for
making learning meaningful
(Mezirow)
