Question No. 1

When reloading Gmail in Chrome, the web browser returns a 500 Error. As part of the troubleshooting process, Google support asks you to gather logs. How can this be accomplished?

- **A.** Chrome > Window Context Menu > More Tools > Developer Tools > Network Tab > Reload the page to replicate the error > ''Export HAR''
- **B.** Admin.google.com > Reporting > Reports > Apps Reports > Gmail
- **C.** chrome://net-export > Start Logging to Disk > Confirm validity with https://netlog-viewer.appspot.com
- **D.** Chrome > Window Context Menu > More Tools > Task Manager > Screen Capture List of Running Processes

Answer: A

Question No. 2

Your company is using Google Workspace Business Standard. The company has five meeting rooms that are all registered as resources in Google Workspace and used on a daily basis by the employees when organizing meetings. The office layout was changed last weekend, and one of the meeting rooms is now a dedicated room for management. The CEO is complaining that anyone can book the room and requested this room to be used only by the management team and their executive assistants (EAs). No one else must be allowed to book it via Google Calendar. What should you do?

- **A.** As a super administrator, modify the room calendar sharing settings, and limit it to the management and EAs group.
- **B.** Delete the room from Google Workspace resources, and suggest using a spreadsheet shared with the management and EAs only for the room schedule.
- **C.** As a super administrator, create a group calendar named ''Management Room,'' and share it only with the management and the EAs.
- **D.** Move the room resource to the management and EAs group so that only they can use it.

Answer: A

Question No. 3

As a Workspace Administrator, you want to keep an inventory of the computers and mobile devices your company owns in order to track details such as device type and who the device is assigned to. How should you add the devices to the company-owned inventory?

- **A.** Download the company owned inventory template CSV file from the admin panel, enter the serial number of the devices, and upload it back to the company owned inventory in the admin panel.
- **B.** Download the company owned inventory template CSV file from the admin panel, enter the Device OS, serial number and upload it back to the company owned inventory in the admin panel.
- **C.** Download the company owned inventory template CSV file from the admin panel, enter the asset tag of the devices, and upload it back to the company owned inventory in the admin panel.
- **D.** Download the company owned inventory template CSV file from the admin panel, enter the Device OS, asset tag and upload it back to the company owned inventory in the admin panel.

Answer: A

Question No. 4

Your organization does not allow users to share externally. The security team has recently approved an exemption for specific members of the marketing team and sales to share documents with external customers, prospects, and partners. How best would you achieve this?

- **A.** Create a configuration group with the approved users as members, and use it to create a target audience.
- **B.** Enable external sharing for the marketing and sales organizational units.
- **C.** Enable external sharing only to allowlisted domains provided by marketing and sales teams.
- **D.** Create a configuration group with the approved users as members, and enable external sharing for this group.

Answer: D

Question No. 5

Your organization is using Password Sync to sync passwords from Active Directory to Google Workspace. A user changed their network password and cannot log in to Google Workspace with the new password. What steps should you take to troubleshoot this issue?

- **A.** Reinstall Password Sync on all domain controllers.
- **B.** Reauthorize the Password Sync tool in the Google Workspace Admin Console.
- **C.** Confirm that the Password Sync service is running on all domain controllers.
- **D.** Reset the user's password in Active Directory.

Answer: C
