Wordpress Basics I

Step 1: Define the Purpose of Your Site - Before you even create your first page or blog post, you must have a purpose for your site in mind. Why are you creating it? What do you want or expect your site to accomplish?

Some possibilities are: Examples of portfolio work/sample writing, course site, Community Service learning site. a company webspace, individual thoughts through online journaling (blog).

Step 2: What are the goals of each user when they visit your site?

Step 2: What content and activity do you want to have on the site?
