

Homepage Customization

Hiding Items on the Homepage

1. Switch to the “Build” tab or “Teach” tab.
(In this example, I will be using the Teach view)

2. Click the “arrow” button on the item you wish to hide. This will display more options to select.

3. Click “Hide Item.”

Note: If the item is also visible on the left-menu, hiding it in the main content area does not hide it for both. You must hide the left-menu items separately.

☺ Make sure to check the homepage in the “Student View” to ensure the item is hidden.
