

# 2016 Ace Census Respondents: Experiences with Sex

The Asexual Census is an annual survey that gathers information on ace communities. The 2016 survey asked a total 91 questions and received 9869 responses. Data on non-ace respondents isn't included in these results.

## Consensual Sex

Have you ever had consensual sex?

74% of ace respondents haven't had sex, 15% have, and 11% are unsure.

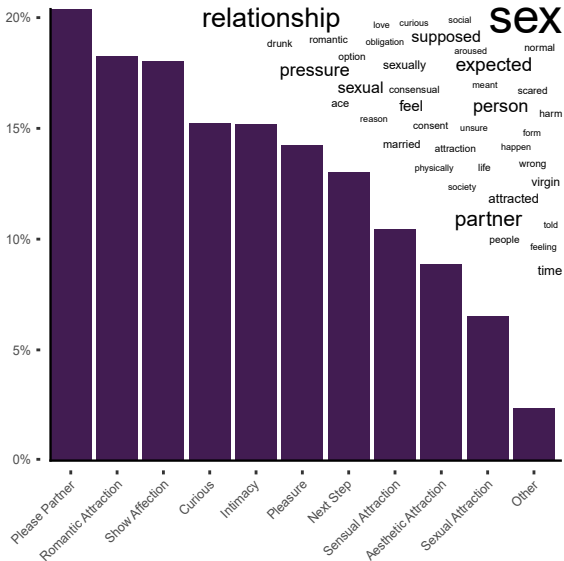

## Reasons for Having Sex

If you have engaged in consensual sex in the past please list reasons why you did.

The most common reasons for having sex are to please a partner, being romantically attracted to their partner, or wanting to show affection. Respondents were able to choose multiple answers so the values add up to more than 100%.

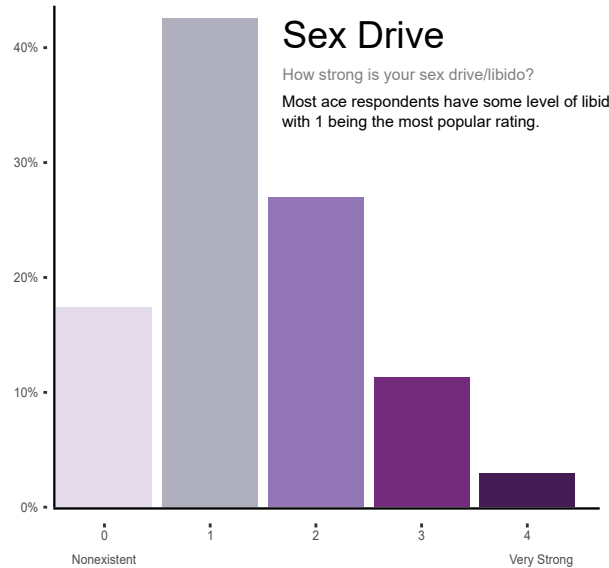

The word cloud shows the most common words that respondents wrote in when describing their reasons for having sex.

## Sex Drive

How strong is your sex drive/libido?

Most ace respondents have some level of libido, with 1 being the most popular rating.

## Age of First and Latest Sex

By your best estimate, how old were you at the EARLIEST/MOST RECENT time you had consensual sex?

Overall, ace respondents skew younger, with a median age of 21. The median age respondents first had sex was 19 and the last time is 23.
