

Share one challenge/barrier per sticky

Students who speak English as an additional language, (listening only is difficult and looking at the chat simultaneously is difficult too, as well as distracting)

I have never worked as a TA

This will be my first time working as a TA so anything I can learn will be valuable.

Creating breakout groups seamlessly

Moving from breakout groups to whole class smoothly

How to go from Canvas to Collaborate Ultra and back without losing students. The same when we break into rooms, some students tend to disappear.

Students asking for help w/ connectivity issues while trying to deliver synchronous activities (and I don't have backup help to triage)

Helping learners who have varying levels of tech abilities

Having connectivity issues and leaving the students without a moderator while I try to reconnect.

What to do if my internet malfunctions!

lack of response from students while they are not using video if the class size is over 30

having students work together on a task and being able to share what they worked on with the whole class

How to create engagement online (when students have multiple options available to them, including being in the class but working on something else simultaneously)

Using multimodality (video + ppt + pdf in one lecture, for example)

Being multimodal

trying to manage multiple tabs/windows during a class without an extra monitor

Keeping students engaged

Losing track of questions that come up in the chat, and not knowing which one to answer first

Connectivity issue especially with the students in different time zone

Some students not having sufficient connectivity to join or keep up with a session - how to equitably deliver the same lessons

Evaluation of students participation

Keeping students engaged online

Students engagement

participation
