

Homepage Customization

How to Remove or Change the Header Image on the Homepage

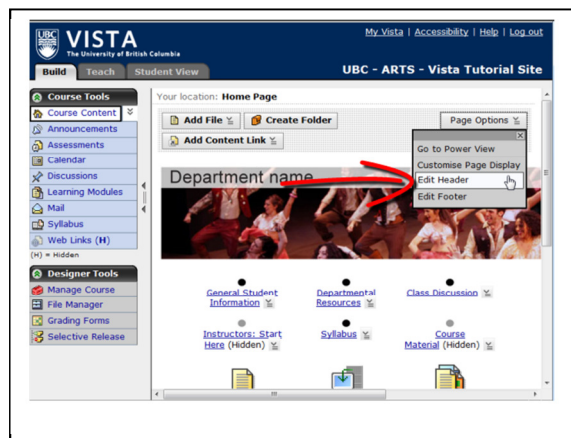

1. Switch to the “Build” tab.

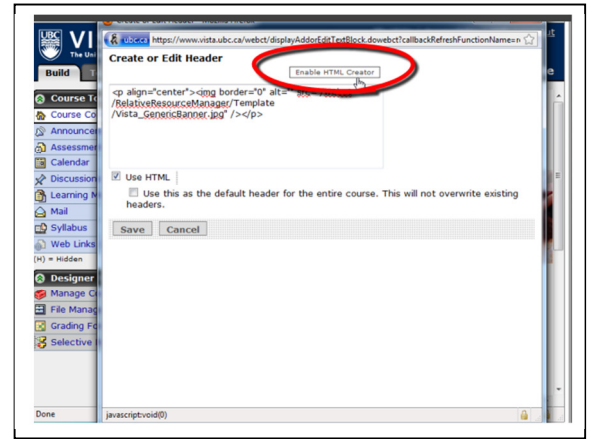

2. Click the “Page Options” button to display more options to select from.

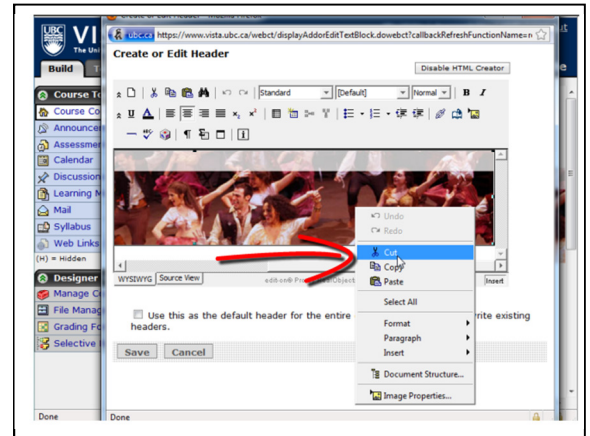

3. Select “Edit Header”

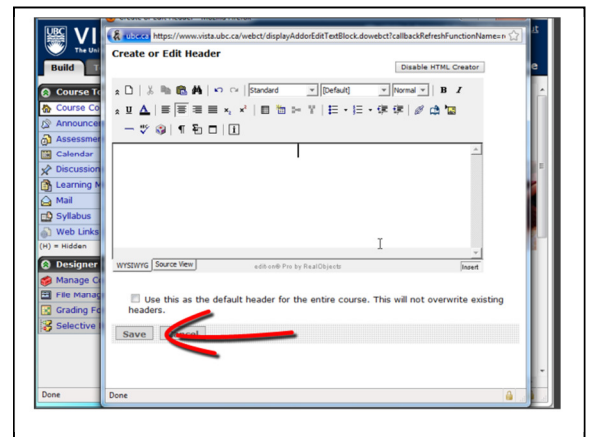

4. Notice in the white box there are some HTML code. You will need to click on “Enable HTML Creator” if you are not familiar with the HTML language.

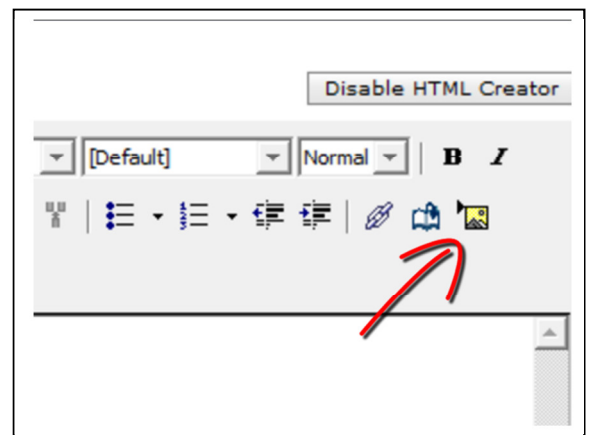

5. To delete the image, right-click on the image with your mouse and select “cut”

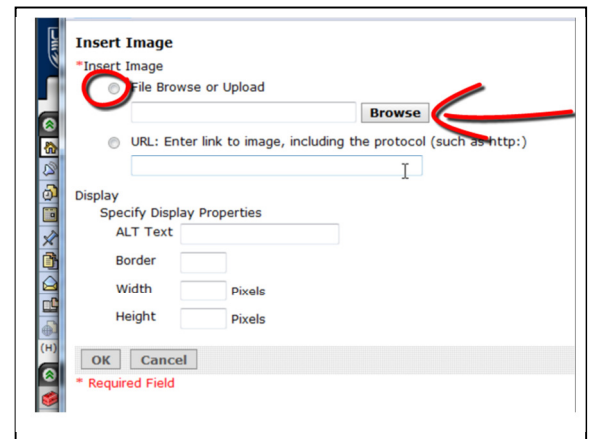

6. Click “Save” when you are done.

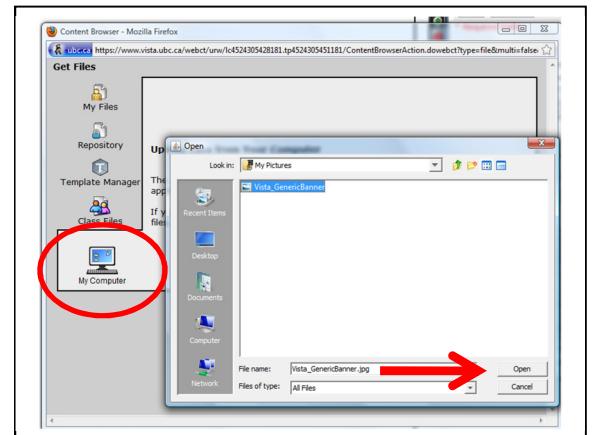

7. If you want to replace it with another image instead, click on the “image” icon

8. Click on the “circle” and click the “Browse” button to select an image from your *file manager* or *desktop*

9. In this example, lets select a files from the computer. Click on “My Computer” and a popup window will appear. Find the image banner you wish to use and select “Open.”

10. If the image is large, consider resizing the dimensions of the picture before adding the image in Vista.
If you do not have a photo editing software, than you can try to use Vista’s built in properties by adjust the width and height fields.

Click “OK” when you are done.
