

Shanghai, China, as an example, resource consumption and changes in the ecological environment are affected by different tourist footprints of tourists (Lin et al., 2018)

THE IMPACT OF **SUSTAINABLE TOURISM** ON THE LOCAL PEOPLE AND NATURAL ENVIRONMENT

This research is aimed to investigate the relationship amongst tourists, the local communities, and the environment, from sustainable tourism perspective.

METHODS

Qualitative interview

Participants x 8

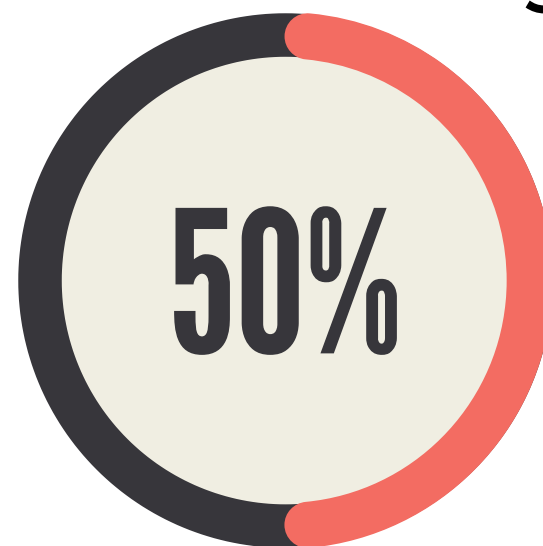

RESULTS

Don't care about the sustainability when travelling

Their behaviors while traveling are sustainable

They think their tourist behaviours are closely related to environmental protection and sustainable development

In today's society, tourism has become an important tertiary industry, and in some countries or regions, tourism has even become the biggest pillar industry of economic income. (Getz et al., 2016)

Our study, hopefully, could be helpful for future researches which are about solutions of existing environmental problems or how to draw the public's attention to environmental protection
