

# Untethered: Tablet Teaching with the iPad

John P Egan, PhD

## Hardware

- iPad 2 or “new” iPad (cameras)
- Stylus
- LCD projector
- HDMI dongle OR VGA dongle with audio cable
- Apple TV with remote
- Charging cable

# The iPad

- Battery life 8+ hours
- High resolution for readability
- Rich media (video, audio)
- Plug-n-play media
- Apps, apps and more apps

## Why Apple TV

- HDMI: high quality audio and video signal
- Portable
- Screen sharing with iPad – wirelessly!
- Mirrors apps without Airplay support

**Note:** both your Apple TV and iPad need to be connected to the same Wi-Fi network

# Productivity apps

- Dropbox cloud storage (no identifying data)
- PDF Expert
- QuickOffice Pro (MS Office analogue)

**Elearning toolkit: a self-directed, integrated aspect of n online educational technology applications course**

**The course**  
5 modules  
13 units  
elearning toolkit  
individual and small group work  
active learning activities  
eportfolio assessment

**The team**

**The toolkit**  
What are the core competencies we would expect from an early career professional educator with a post-graduate credential in educational technology?

Range of skill levels at the outset; range of interests driven by context, practice and personal preference.

Structure that afforded customization and flexibility. Comprehensive. A lack of ambiguity in instructions. Encouraged reflections on each activity in eportfolio.

No “how-to” instructions in descriptions of required assignments/components of eportfolio. All students would need to use the toolkit to complete at least some of the requirements. Also messaged that the toolkit was not—and should not be—the only resource available to support their self-directed explorations.

Encouraged collaborative work, to foster community of practice sensibility.

# Influence of Attitude on E-Learning: An Application of Technology Acceptance Model

## DF Expert

### Abstract

The study examined the attitude of students towards e-learning in selected Nigerian universities. Specifically the study looked at the relationship between attitude and e-learning with the application of Technology Acceptance Model (TAM). Questionnaire was used to collect data from a sample of 387 postgraduate and undergraduate students. Statistical techniques used for the analyses of data were frequency distribution, simple linear regression, One-Way ANOVA and paired T-test was used to test the hypotheses. Findings showed that students have a positive attitude towards e-learning because they find the system easy to use and useful for their course work. Also, attitude influences the intention to use an e-learning system.

**Keywords:** Attitude, E-learning, Technology Acceptance Model, Nigerian Universities, Technology

### Introduction

Students learning in tertiary institutions all over the world have undergone tremendous transformation, especially since the advent of information and communication technology (ICT) (Bassey et al, 2007). There is a shift from traditional approach of teacher directed to modern methods where computer technology plays a significant role. ICT has promoted learning and made it more meaningful, where students can stay even in their homes or classrooms and receive lectures without seeing the lecturer. The aspect of ICT that has brought about this revolution in students' learning is e-learning.
