

Considerations:

- I want my students to contribute to community beyond UBC
- I want to collaborate the course/project with an institution/ faculty outside of UBC
- The subject matter that I am teaching is not covered well in Wikipedia
- I want to use Wiki in a more protected environment
- My students are planning to write about original research
- My students will be working on a controversial topic

Create a course in <http://www.wiki.ubc.ca/course>

Considerations:

- I am confident with Wikipedia
- I want to manage my Wiki assignment by myself
- My assignment is in a smaller scale (For ex: copyrighting and adding citation)
- My assignment is complex (For ex: creating a new article in Wikipedia)
- I want to track my students' progress easily
- I want to use a template to create my wiki assignment

Plan how do you want to create an assignment, train students, and ask students to edit directly on Wikipedia
