

Setting Up the Clicker Software

1. Open the iClicker application on the USB flash drive and click "**New**"
2. Enter your course name under "Course Name" and click "**Create**"
3. "**Choose**" the course you just created and click "**My Settings**"
4. Add the Instructor's remote ID found on the back of the blue remote
5. Click "**Set for Course**"

Running a Polling Session

1. Plug the iClicker receiver hub in to your computer and open the iClicker application
2. Select your course and click "**Choose**". Then click on "**Start Session**"

3. A toolbar will pop up in the top left corner of your screen. Click the "**Start**" button on the toolbar to start a question. Click the "**Stop**" button to stop. If you are using a blue instructor remote, the "**A**" button can be used to start and stop polling.

4. A timer will appear and will count up. A counter shows the number of votes received.
5. Click the bar graph icon to display the results for your question. If you are using a blue instructor remote, the "**B**" button can be used to display the graph. Click the icon or "**B**" again to hide the graph.
6. Click the "x" button at the top left corner of the toolbar when you are done your session.
