

Planning Your Wiki Pages

Question 1: What is the purpose of your page (s)?

Consider: Am I creating a single page or series of pages on a theme/for a course? Is this a collaborative project or personal?

Question 2: What will your page be about?

Consider: You may want to have an introduction to your page to make it easy for editors/collaborators or readers to understand. This is especially important if there are multiple subpages.

Question 3: How do you want people to use your page?

Consider: Is this an assignment for a course? A collaborative project? A presentation or documentation? Do you expect people to edit your page? Discuss content? This will help define your orientation needs.

Question 4: What will be the main elements on your page?

Consider: Links? References? Media?
