

SYLLABUS

If a template was used to build your course, all you need to replace is the syllabus file in the file manager. If you are building the course from a blank shell, move to adding the syllabus tool.

Replacing the Syllabus File

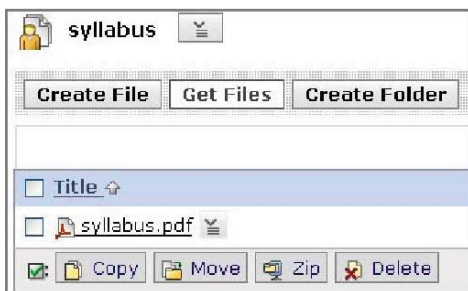

1. Save your syllabus as a pdf on the desktop for easy uploading
2. Name the file "syllabus.pdf"
 - You can use Adobe Acrobat Professional or cutepdf writer (a free software download: <http://www.cutepdf.com/Products/CutePDF/writer.asp>)

3. Under Designer Tools click **File Manager**

4. Click on the syllabus folder

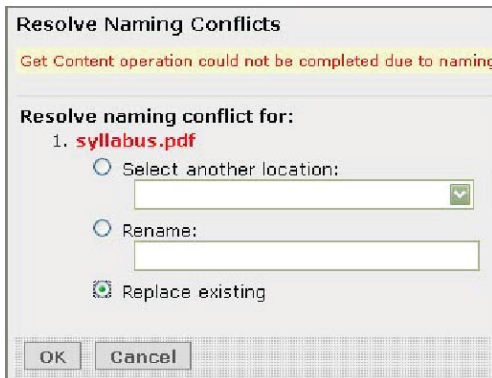

5. Click on **Get File**

6. Find the file on your desktop by double clicking on **My Computer**

7. Double click on syllabus.pdf or select the syllabus and click **open**
